

## BECOME A LICENSED SYSTEMS INTEGRATOR

Are you interested in becoming licensed as a partner company? We warmly welcome you to contact FSB Bautechnik. We'll provide you with all of the information you need about the new technology and conditions for you to achieve a special market position in your region using the **SpectraShield** system. FSB Bautechnik supports **SpectraShield** support across Europe and offers product quality assurance, engineering, and support.

The requirements for a partnership include having one or more employees thoroughly trained with the system at FSB Bautechnik (graduation certificate) and an investment in the required equipment (purchase or rental services).

### YOUR BENEFITS:

- Indestructible patented material featuring DIBt approval.
- Sustainability of your rehabilitation work.
- Market positioning in the license region as a **SpectraShield** systems integrator.
- Quality assurance by FSB Bautechnik.
- Training for your employees provided by FSB Bautechnik.
- Acquisition of new, satisfied customers.
- Pole position in the rehabilitation market thanks to quality, profitability, and sustainability.

## ABOUT FSB BAUTECHNIK

FSB Bautechnik possesses the European distribution rights for **SpectraShield**. It imports the system from the manufacturer and patent owner, CCI Spectrum Inc., from Jacksonville/USA. FSB is an integral component of **SpectraShield**'s worldwide rehabilitation network.

Services available from FSB Bautechnik:

1. Distribution of the necessary materials and certified equipment
2. Development of a comprehensive network of licensed specialists who use **SpectraShield** according to the original quality standards.
3. Training courses and qualification procedures that ensure the transfer of know-how to our licensed specialists.
4. Implementation of an efficient quality assurance system.
5. Guaranteed availability of materials.
6. Qualified engineering and support for solving challenges presented by construction conditions.
7. Research and development.

Detailed information is available at our website [www.fsb-technik.de](http://www.fsb-technik.de)

## SUSTAINABLE BUSINESS OPPORTUNITIES FOR SEWER REHABILITATION SPECIALISTS

- Leading technology
- Efficient complaint-free system
- Training courses and quality assurance
- Attractive business model

**The key to success for installation specialists**

**SpectraShield®**

## SEWER SYSTEM REHABILITATION BOTTLENECK

In European countries sewer systems have aged. In the majority of their thousands of km long sewer-network, there is a serious need for rehabilitation. Mainly the cities and communities themselves are responsible for this, whose duties include disposal of sewage water and whose capital assets often include sewer networks in the top position. For this reason, decision makers have a vital interest in maintaining these valuable assets for the future and efficiently and sustainably repairing damage.

The necessary procedures are completed by sewer rehabilitation specialists according to the specifications in the request for call for proposal and under the supervision of the planning engineers.

Are you interested in these contracts, and would you like to distinguish yourself from your competitors in terms of technology? Acquire a license to increase your success. As a licensed **SpectraShield** system integrator, you'll improve your business opportunities for rehabilitation projects involving sewer structures in particular through the use of leading technology and an established market share.

## MARKET RESPONSIBILITY AND OPTIMAL SUPPORT

If you a quality-oriented specialist, the **SpectraShield** system will help you increase your position in the market significantly. As a licensed systems integrator, you will be working with the most advanced technology. And that means increased efficiency for your employer, improved profitability, and guaranteed sustainability.

Here's what the **SpectraShield** system offers:

- Indestructible patented material featuring DIBt approval
- Purchase of the required certified equipment with rental options via FSB Bautechnik
- Comprehensive training course for your employees from FSB Bautechnik including certificate
- Special application technology
- Trustworthy holistic quality assurance system from FSB Bautechnik
- A license including established market share that pays for itself

As a licensed systems integrator, you'll achieve an outstanding competitive position for rehabilitation projects required by civic and city works and other commercial and private employers in your marketing region.

## HERE'S HOW SpectraShield WORKS

The four step application of the **SpectraShield** multi-layer polymer system is the perfect solution for problems like corrosion, infiltration, exfiltration, missing mortar joints and exposed rebar.

### 1. Preparation

High-pressure water blasting free the surface of the structure from dirt and accumulated materials to prepare it for the coating process.

### 2. Moisture barrier

Modified hybrid polyurea is simultaneously a moisture barrier and a holding primer, and it forms an extremely resistant surface as the inside-layer layer.

### 3. Surface

Gas-proof polyurethane foam fills all surface defects, eroded areas, cavities, pores, and joints and reprofiles the original emplacement.

### 4. Corrosion Barrier

The top-coat of modified hybrid polyuria forms the sustainable surface protection including unique resistance against chemical influences, temperatures, and mechanical stress.
